RS2 Technologies

is a technology-driven manufacturer of cutting edge

ACCESS CONTROL

HARDWARE AND SOFTWARE SOLUTIONS

RS2 Technologies has a reputation as a "one-stop" solution for the access management needs of customers in a wide variety of applications.

RS2 delivers a cost-effective access management solutions to customers in industries as diverse as shipbuilding, energy, hospitals, education, defense, banking, government (federal, state and municipal), museums, and a variety of diverse manufacturing companies. From small office buildings to large industrial facilities, RS2 has the products to meet the needs of business and industry.
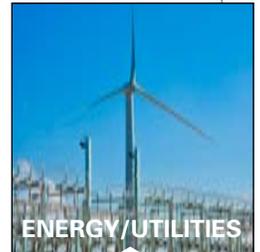

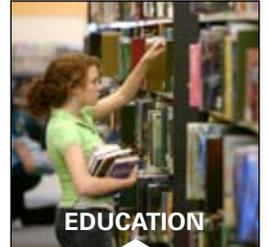

Innovation pervades our company culture. You will see it in our products and in our approach to customers. Whether it's our integration of customer suggestions into the next edition of our software or our use of a web-based technical support system, we try to bring innovation into everything we do.

RS2 hardware products are based on the most reliable, industry-proven hardware available. Our products not only undergo rigorous bench and field tests, but have been proven through years of service in a variety of demanding environments. Our software, based on proven Microsoft® core technology, undergoes multi-level, multi-platform testing, as well as extensive beta testing.

RS2 engineering, service and administrative staffs boast a long history in the access control industry. This is highlighted by a knowledge base that includes backgrounds covering a wide range of security industry disciplines. The owners and principals of RS2 Technologies have been involved in the electronic access control industry since the 1970's, and are active in a number of national and regional security associations and trade groups.

RS2 Technologies is dedicated to providing expert technical support and services in a timely and accurate manner. We understand that supporting our customers' needs is as important as the products that we develop. That's why a real person will answer the phone when you call for product support.

RS2 products are available through a nationwide network of experienced dealers. We have invested considerable time and effort in building a network of dealers who have years of service in access control. RS2 only works with dealers and security system integrators that can create total security solutions for customers.

Industry-proven Hardware

RS2 Technologies has developed an integrated family of access management hardware that can be configured to meet a wide variety of applications. It is built around our workhorse System Control Processors, which are 32-bit microcontroller-based units that are scalable from 6 MB to 12 MB, making them a cost-effective solution for very small to very large systems. A variety of input/output modules, communications packages, and other options provides unparalleled flexibility. We also offer stand-alone systems such as NExT Step[SM] (an expandable 2-64 reader system that requires no computer or software installation) and Step Up[SM] (an easily installed retrofit to replace legacy systems).

Access It!® Access Management Software

RS2 Technologies' Access It!® line is the industry's most advanced, easy-to-use access control software. To accommodate a wide range of applications, the software line ranges from Access It!® Lite.NET, an entry-level, single-user system, to Access It!® Universal, a scalable system that can be expanded from single-building control into a multi-user, enterprise-wide system. Access It!® was designed from the ground up, with the end user in mind. It's simplicity results in an operational access control system in minutes instead of hours.

Technical Resources

RS2 supports its dealers and customers with a wide variety of technical resources, available through our web site, which features an extensive Search function, as well as a list of FAQs. Training videos are available to dealers and to customers with Direct Support Agreements. In the Technical Resources section of the site, we post our popular series of White Papers, which cover such topics as Total Cost of Ownership, Open Architecture, and Integration. Also available are Case Histories and Integration Sheets covering the integration of access control with sub-systems such as DVR/NVR, Intrusion Detection, and Wireless/IP Locksets.

Service and Support

RS2 Technologies is dedicated to providing expert technical support and services in a timely and accurate manner. We understand that supporting our customers' needs is as important as the products that we develop. In addition to 24-hour phone and e-mail consultation, we also use the web-based Team Viewer system to assist customers with rapid diagnosis and resolution of support issues. Team Viewer allows us to instantly share and interact with remote customer desktops – anywhere in the world.

The RS2 System Control Processor is the heart of every RS2 access management system.

Access It!® Universal features a browser (web) thin client, a mobile client, and screens that can be un-docked and viewed on separate screens.
