

## APPLICATION CASE HISTORY

### ACCESS MANAGEMENT SPECIALISTS

#### Palm Beach Leads with RS2 for Access Control

<b>Customer:</b>	<b>Palm Beach County Health Department</b>
<b>Systems Integrator:</b>	<b>Protect Video, Boynton Beach, Florida</b>
<b>Security Requirements:</b>	<b>Ability to integrate with CCTV, badging, visitor management and intrusion detection, and compatibility with existing security equipment.</b>
<b>Solution:</b>	<b>RS2 Access It!® Universal</b>

The Palm Beach County Health Department is a service organization responsible for the health of **over a million residents** in Palm Beach County and shares responsibility for primary care of the medically indigent population of the county with the private sector.

The Department has served as a model agency for the State of Florida and many other states throughout the country. For over 50 years it has led the way with innovative programs that include free immunizations for children and parental education in child care.

Additionally, the Department monitors and tests for potential epidemics, and conducts land, air and water monitoring.

Construction of the new PBCHD Administration Building was completed in September of 2009. The new building, which is located in downtown West Palm Beach, includes over 80 doors, 5 elevators and an RFID Gate Entry System. Systems Integrator Protect Video, Inc. of Boynton Beach, as the security integrator for the project, selected RS2 Technologies and its patented Access It!® Universal software because of its ability to integrate with the other systems such as CCTV, badging, visitor management and intrusion detection. The installation also includes a live monitoring station where onsite security personnel can monitor both the CCTV and access control systems to ensure a safe environment for both staff and customers.

Healthcare and government facilities are significant markets for RS2 technologies. RS2 access control systems can be found in hospitals, medical facilities, and Federal, state, and local government facilities throughout the United States.
