

GSA Schedule 84 Contract Goes to Security-Net Partners

The U.S. General Services Administration (GSA) recently awarded a GSA Schedule 84 contract to Security-Net member companies Cam-Dex Corp., RFI Communications & Security Systems and The Protection Bureau. Together, the three firms will direct-sell total solutions for law enforcement, security, facilities management, fire, rescue, clothing, marine craft and emergency/disaster to U.S. government agencies at pre-negotiated prices.

According to a press release, the contract provides federal agencies with an expedient way to purchase security system integration, design services, security management and support services. The pre-negotiated prices also will be extended to state, county and city government agencies.

RS2 Technologies Named Platinum Partner

Mercury Security Corp. of Long Beach, Calif., has named Munster, Ind.-based RS2 Technologies LLC, a provider of access control systems, as an initial member of its Platinum Partners program.

“RS2 is very proud to have received this designation and is grateful to Mercury Security,” said Doug Robinson, RS2 Technologies managing partner. “Mercury’s open architecture approach to hardware design is one of the cornerstones of our system.

“We look forward to continuing this technical collaboration as a Mercury Platinum Partner,” he added.

According to Frank Gasztonyi, CEO of Mercury Security, the program was created to recognize some of Mercury’s OEM clients for their efforts to implement some of its newest technologies.

“Through the Platinum Program and partners such as RS2 Technologies, we further reward and cultivate the open exchange of ideas, which will translate into new product features that ensure superior performance, Gasztonyi said.

“This will save agencies — and taxpayers — the cost of having to complete a lengthy competitive bid process,” said John Krumme, CPP, president of Cam-Dex Corp. in Kansas City, Kansas.

Security-Net is a network of 24 independent international systems integrators providing clients with a single source for all electronic security needs. For information visit www.security-net.com. ■

THERE’S A REASON WE NAMED OUR VISITOR MANAGEMENT SYSTEM **EASYLOBBY®**

In 20 seconds or less, you can capture the visitor’s information automatically from a license, passport or business card scan, and print a professional looking, full color, customized badge.

EASY FOR ALL

We’ve been doing this for thousands of customers worldwide for over 10 years. It’s so easy to use, we can train anyone in an hour flat, for free.

SCALABLE AND INTEGRATED

Deploy one system or a network of hundreds, with central administration. Plus, we’re tightly integrated with 30 different access control systems.

NO RECEPTIONIST? NO PROBLEM.

EasyLobby offers a fully customizable self-registration (kiosk) mode for unattended visitor check-in, in 8 different languages.

So throw away that paper guest log, and enhance your security and your corporate image with an EasyLobby Visitor Management system.

TRY IT FOR YOURSELF AND SEE.
